#### “MUSEO DE LAS NUBES” Project

MUSEO DE LAS NUBES

Barcelona, may 2021

Dear Sir or Madam:

I am Enrique Sánchez Méliz, president and founder of Ecometta Association, which is located in Badalona, Barcelona (Spain). We are a non-profit organization, registered in the General Management of Law and Juridical Entities from the Justice Department of Generalitat de Catalunya. Since we started, sixteen years ago, we've devoted ourselves to scientific divulgation, specially, about climate change and its effects to environment and meteorology. We do this by means of workshops, conferences, seminars at schools and educational centres, groups of disabled people and people at risk of social exclusion.

We collaborate with different entities, both, national and international, some as important as the [State Meteorological Agency \(AEMET\)](#), [Fabra's Observatory in Barcelona](#), [the Astrophysics Institute of the Canary Islands](#) and the [University of Barcelona](#).

It is with this letter of presentation that I am glad to announce you the reason why we have contacted you in the first place.

Along with the works mentioned above, and taking advantage of the experience gained over these sixteen years, we have created the project "Centro de Interpretación Meteorológica MUSEO DE LAS NUBES" (Meteorological Interpretation Centre CLOUD MUSEUM) which is an interactive interpretation centre, new and unique in the world, dedicated to clouds, meteorology and how climate change affects our everyday lives and society in general.

The building where our museum will be located will be one of new construction with an unusual and characteristic appearance. It will be energetically sustainable and it will include the last and more innovative technologies to make it 100% accessible to people with, both, physical or sensory functional disabilities. It won't be just a traditional museum but it will also be a small amusement park, where children, as well as people in general, without previous knowledge in Meteorology, will be able to learn complex concepts in an easy way by means of individual, family or group experiences. It will be a knowledge, experimentation and research centre, thanks to its I+D+I in constant evolution, which will develop new projects to be implemented in our facilities.

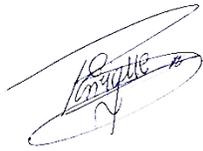

At this stage of the project, we are in search of partners, sponsors, investors, entrepreneurs and, why not?, "patrons" who share our values, enterprising spirit and unique vision, and who are interested in helping us make this dream come true by creating the necessary strengths, synergies and competitive advantages that stem from the merger with a good business partner.

If you are interested in learning more about our project, please, do not hesitate to contact us at [ecomettaorg@gmail.com](mailto:ecomettaorg@gmail.com)

I am really looking forward to hearing from you.

Yours faithfully,

Enrique Sánchez – President - Founder-
